

Safety, Longevity and Durability...

## Best Lifetime Value in the Industry

Handheld Remote Control functions up to 900' from the pumper, controls all functions and movement of the articulated waterway and tower mounted equipment.

96.9% Coverage Area

Provides a 1500 GPM Fire Stream Covering Over 155,000 Sq. Ft.

Rear Step Area Provides Easy Access to the Hosebed and Water Tower Secondary Controls.

The overall structure of the stabilization device is configured to handle the large volume of water.

### Built For Stability

- Offered with the proven Marauder Cab & Chassis with seating for up to 8.
- Stainless steel cab and body construction
- Cummins engines up to 500 Hp.
- GVWR axle ratings as low as 49,800 lbs.

OVERALL HEIGHT AS LOW AS 10' 5"

# HydroForce™

Articulating Water Tower

The HydroForce™ Articulating Water Tower Offers Superior Customer Value as a Multi-Purpose Apparatus Allowing You to Do More with Less Equipment and Personnel.

The HydroForce™ is Mounted on a Single Axle Chassis with a Short Wheelbase, Making It Highly Maneuverable to Limited Access Areas and Tight Locations.

The Small Footprint and High Water Flow Volume Combination is Unique in the Fire Apparatus Industry, and Not Available From Others.

## Fire Scene Command Capability From a High Vantage Point

- 56,000 Lumen FRC elevated light tower
- Real-time suppression feedback through on board thermal imaging camera.
- Fireground observation through water tower mounted camera for eye in the sky scene assessment.

**1500 GPM**  
WATERWAY FLOW  
CAPACITY

## 50% More Waterway Flow with Excellent Operations Flexibility

- Industry leading 1,500 GPM waterway flow, 500 GPM more than other manufacturers.
- Effective stream reach allows for as much as 155,000 square feet of water coverage.
- Protected internal waterway in upper boom.

**35'**  
Horizontal Reach

**60'**  
Vertical Reach

**360°**  
Rotation

## Speed and Ease of Setup

- Auto-deployable A-frame outriggers with 11 feet - 6 inch total spread which allows for ease of set up on tight streets, alleys, and cul-de-sacs.
- Innovative design eliminates the need for jack pads.
- Handheld remote-control functions up to 900 feet from the apparatus.
