

You'll find outstanding features available on the Specialist Walk-in models

Cab-Body Access Door

- Door located between the cab and the front of the body
- Features a complete bellows-type seal
- Convenient sideways-sliding open and close design
- Built in window for visual contact from either side of door

Large double-door access

Body Floor

- Non-slip treadplate over 3/4" plywood sub-floor
- Minimizes noise through floor
- Helps retain interior temperatures

Body Ceiling and Walls

- Rigid-foam insulated
- 1/4" washable white vinyl coated, medium density fiberboard
- A bright interior that's easy to keep clean

Walk-in hallway looking towards the rear

Interior Lighting

- Windows
- Skylight
- LED dome lights
- Mini fluorescent lights

HVAC

- Two Heating/AC combination units:
 - 5,000 BTU heating
 - 25,000 BTU cooling

Skylight/roof access

Action Wall

- Wired and strengthened wall for mounting and accessing various switches and controls

Electrical Systems

- Heavy-duty 12-volt wiring
- Line voltage supplied by 120/240V power source
- Square D 24-unit circuit breaker
- Shore-line system to all 120VAC electrical devices to be powered from both the on-board generator and from shore power

Seagrave Cab

- Seagrave custom cabs
- Stainless steel enclosed cage design
- Stainless steel or aluminum cab construction
- Full-tilt, split-tilt and extended tilt cab designs — all from 2 to 10 person capacity
- Minimum 58" floor-to-ceiling height in cab
- Flat or optional 8" and 14" raised roofs

Chassis

- Meritor (MFS) front axle, Independent Front Suspension, and FWD semi-elliptical, constant-rate, spring front suspensions
- Reyco, Neway, Hendrickson and FWD semi-elliptical constant rate rear suspensions
- Drum or 17" EX225H disc brakes
- Dynamic variable section frames available
- Specially designed front bumper frames

Available Engines (Cab Dependent)

- Detroit Series 60
- CAT C9, C13
- Cummins ISL, ISM

Electrical System

- All NFPA compliant
- 110/220V and duplex receptacles
- Generators — hydraulic, diesel and PTO driven

Seagrave Service

Seagrave Fire Apparatus are sold and serviced by a nationwide, factory-trained dealer organization that is readily available to assist with all your service and technical support needs for the total Seagrave product; including cabs, chassis, bodies, pumps, ladders and aerial components. In addition, these professionals can help with specifying all the many features and options on your new custom Seagrave. Your local Seagrave dealer can be identified on the Seagrave web site, or by calling us.

Specialist

Versatile and dependable, ready to meet a future of possibilities

Build your Seagrave Specialist Rescue from the ground up with the space, the compartmentalization, the power, the functional variety and mission performance to adequately handle any situation your department may face. Through this custom design approach, you'll have control over every detail from bumper to bumper — including your budget.

From cab construction and chassis suspension to doorways and stairways ... from floors and ceilings to drawers and doors ... the best materials, designs and configurations are available on the Specialist Rescues to fit the most demanding requirements.

Use this brochure as an overview of the many features and options available on your Specialist Rescue. Then connect with a Seagrave dealer to explore and specify each of the variables and construction details.

The Specialist Rescues carry on the Seagrave tradition of superior construction and high-performance design features. When you've got a special task ahead of you, respond with the confidence of a Specialist.

Dedicated to quality since 1881

Seagrave™
